

established by the Animals for Research Act (Ontario), and the Canadian Council on Animal Care (CCAC). In order to achieve this mission, the UACC has chosen to review all Queen's University sanctioned activities involving live animals whether they are to occur on Queen's property or otherwise**.

In order to facilitate this process, the UACC requires advanced notice of any proposed events.

Although a full animal use protocol may not be required, the following information does need to be provided for review and final ap2 (g)-2.9 .02 77.76 462.6 Tm [(be)-1.9 ()0.5 (pr)0.9 (o)-3.8 (v)1 Tq42.88 475.5 19.859.

- x Description of animal use
- x Study endpoints (the length of time that animals will be involved from receipt to return)
- x Potential animal stressors and prevention
- x Humane endpoints (when an animal would be withdrawn from thd <0078>Tj /TT36IT()0.5 (t)0g (m)-4.2 ()0.5 siwu5 (w)0.
- x Health & Safety concerns (pathogen risk, escape risk, safety considerations, PPE etc.)
- x Additional information as relevant (i.e.: permits, insurance etc.)

The UACC Coordinator (uacc@queensu.ca)

_____) should be contacted when events are planned involving vertebrate animals. Requests should be submitted in a fashion that provides ample time for UACC review and potential request for clarification (at least 2 weeks prior to the event is recommended). Generally, the request for the use of live vertebrate animals in demonstrations will be reviewed by the UACC Subcommittee; however, certain circumstances may warrant full UACC review. Please note that a representative of the UACC may request the ability to attend the activity.

Revision History:

Date	New Version
11/28/2012	Policy Created and Approved
05/21/2015	Triennial Review; Reference to CCAC Terms of Reference for Animal Care Committees
04/26/2018	Triennial Review
02/25/2021
