

AIMday™ Future of Livable Cities

Cities face ongoing challenges that affect our quality of life. As we begin to recover from the pandemic, organizations have an unprecedented opportunity to chart new paths and reimagine how our cities can better support and sustain our community members.

Academic Industry Meeting day, known as AIMday™, is a unique opportunity where academic experts workshop a question or challenge from organizations. In each one-hour roundtable:

- Explore solutions to your organization's challenges and questions.
- Cultivate industry/academic collaborations for maximum real-world impact.
- Envision and implement the future of cities with other companies, organizations and researchers.
- Access state-of-the-art knowledge, ideas, technology and insights.

AIMday™ FAQs

Who can pose questions at this AIMday event?

We welcome questions from companies and other organizations.

What kind of questions can I ask?

The questions can be very wide or very narrow in scope. We don't put any restrictions on the question formulation, and it's you and your company who decides the character of the question. Upon request, we can help you formulate your problem into one or more questions.

How many questions can I ask?

A maximum of five questions per company can be asked. Past experience has shown that the best results are yielded when at least two representatives from your company attend the workshop discussions.

Will other organizations take part in our workshop?

This is something for you and your organization to decide. AIMday is an opportunity to connect with world-class researchers and have them focus exclusively and confidentially on your challenges. If you feel that you would like to open up the workshop to other organizations in order to address systemic industry challenges, please let us know when you submit your question and we will make the necessary arrangements.

“

Fast track solutions through industry/academic collaboration.
