

Photonic Neural Networks Applications

B. J. Shastri^{1,2}, C. Huang², A. N. Tait², *institute* in computing, communication, and signal processing.

Keywords—Silicon photonics, neural networks, computing, machine learning, optical neural networks, optical computing.

Photonic technology has traditionally been used for long distance communication. However, modern bandwidth requirements and the standardization of silicon photonic integrated circuits (PICs) has led to the proliferation of shorter distance photonic links. For example, silicon photonic transceivers are now a pervasive component in datacenters. There has been growing interest in using silicon photonics as an enabling platform for uncon-
