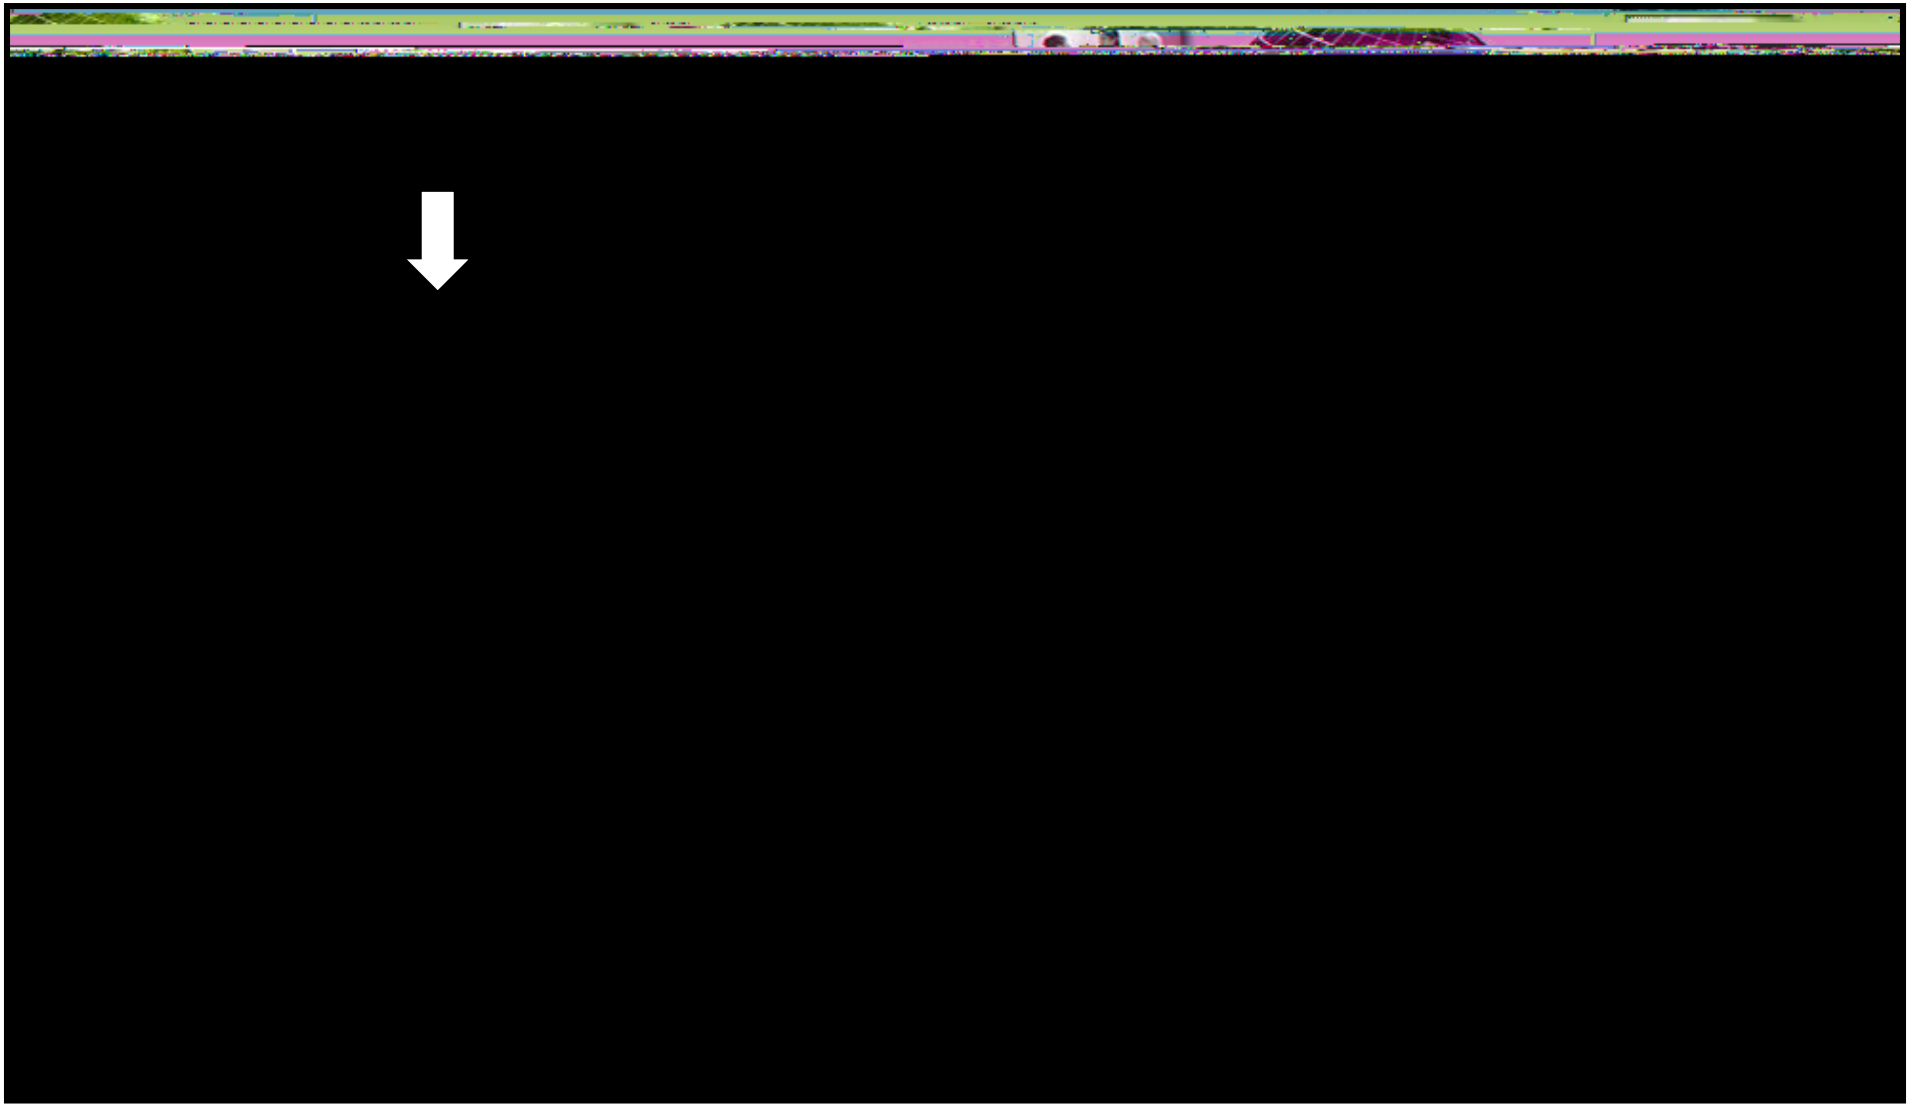
In order to search for chemicals, see profile information, and create inventory reports, select the ‘View/Update’ tab.

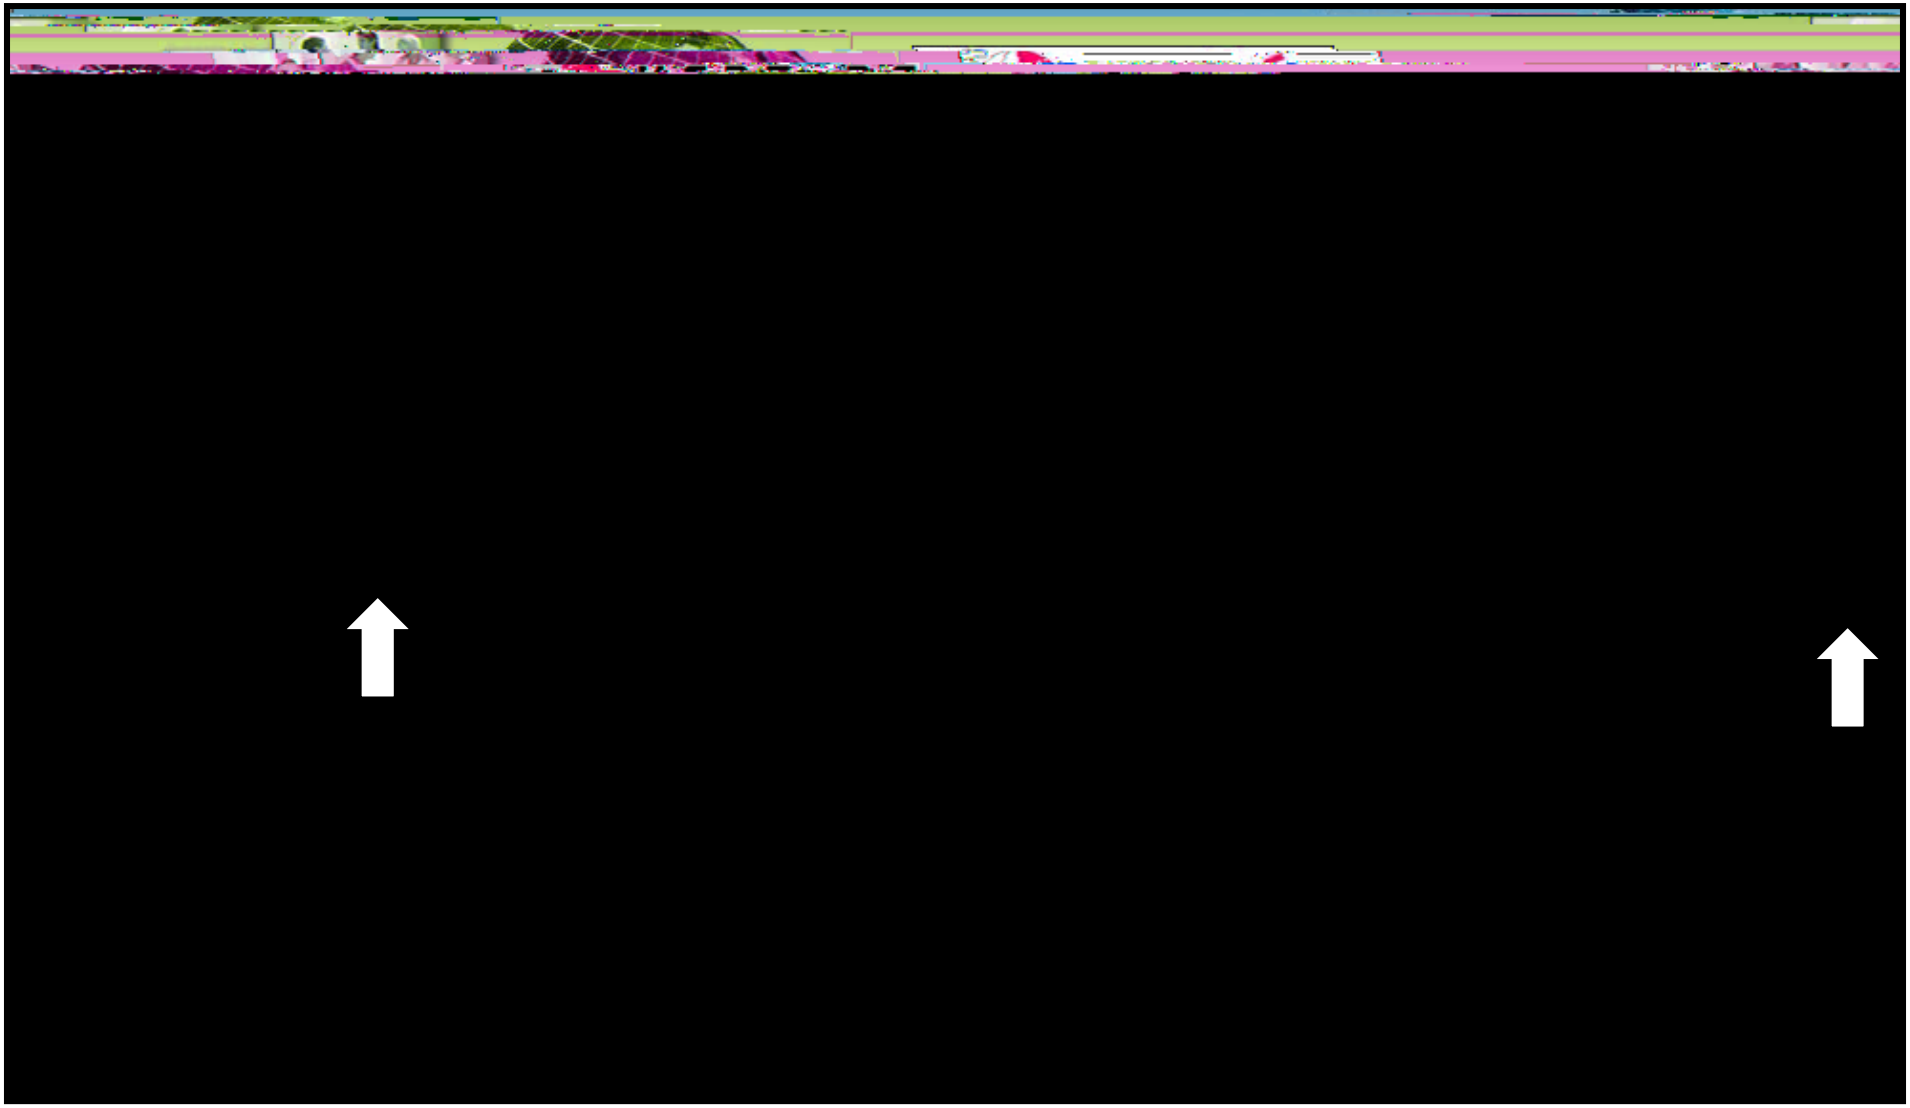
SEARCHING FOR A CHEMICAL

There are two methods of searching for a particular chemical. The first is using the ‘Search’ tool.



Using the ‘Query Tool’, add as many search conditions as

Click the ‘Search’ button once all conditions have been added. Click ‘Select’ to update or delete a particular field.



All search results matching the query will be returned.
