

Mathematical Melodies

Groups

Music and Lyrics by Ruth Jean Charles

Groups

2x2, 2x2

This happens when you multiply
But really this is a disguise of two groups of two
Don't just stand around come on, join in and clap with me

Groups of 2, Groups of 2

Bilinguals, and bicycles, bifocals and bilaterals
Are two groups of two
Don't just stand around come on join in and clap with me

3x3, 3x3

This happens when you multiply
But really this is a disguise of three groups of three
Don't just stand around come on join in and clap with me

Groups of 3, Groups of 3

Trilingual and tricycles, triathlons, and trilogies
Are three groups of three
Don't just stand around come on join in and clap with me
